

## Working Group of Cabinet of Ministers Pays Friendly Visit to Largest Prefabricated Panels Factory in Parand Industrial Town

### Founder of State Industrial Construction Technology Exchanges Views with Senior Officials

The meeting which was held in the presence of deputy minister of Industries and Mines in Industries Affairs, head of Tehran Province Industries and Mines Organization, Friday Prayers Leader and governor of Robat Karim, members of Banks Facilities Headquarters and some of officials and activist of Tehran Province Industries and Mines Organization at Paykar Bonyan Panel Factory, based in Phase 1 of Parand Industrial Town, Mr. Mostafa Mahmoudi introduced six affiliated companies to Paykar Bonyan Panel Group, regarded as a holding company with more than half a century experience in the field of implementation of industrial, production and exports projects.

While welcoming participants, the senior official of the company termed observing requirements of international standards as the sole way for success, glory, progress and sustainable development of country.

He pointed to the countries of Germany and Japan and said, "Despite shortfalls and obstacles faced the two countries, both Germany and Japan managed to compensate damages incurred as a result of world wars and consequently, they attained remarkable achievements.

While enumerating valuable resources in the country like oil, gas, various types of mines, unique climatic condition in four seasons of year, strategic situation and existence of talented and genius people, he placed special emphasis on boosting durability of buildings, through taking advantage of most modern technologies, as the sole solution for encountering with housing shortage problem.

He pointed to some achievements gained by the company such as winning 1st Architect Award in 2007, receiving statuette in 2008 World Architectural Festival (Barcelona), registering name of company in 2009 Architectural Records Magazine (U.S.), winning commendation certificate as exemplary industrial unit in Tehran Province, and also winning technical certificate from the Ministry of Housing and Urban Development, winning numerous ISIRI logos and Quality Management Assurance certificate (ISO 9001), etc.

Paykar Bonyan Panel Company started its activity approx. one decade ago with the aim of industrial production of building with the cooperation of prestigious Italian Emmeduec Panels Company, owning 40-year experience in this industry. With commissioning a large industrial unit in first phase of Parand Industrial Town, this company was turned into one of the largest industrial hubs in building sector.

As a matter of fact, Paykar Bonyan Panel Company is a holding company with more than half a century experience and is comprised of six affiliated companies which are active in the field of commissioning industrial, production and exports projects.

With commissioning affiliated companies, Paykar Bonyan Holding Company has focused all its activities on complete transfer of building advanced technology, importing production line, optimizing production lines and commissioning research and development department, compilation of technical know-how for localization of technologies, offering consultation and design services coupled with construction of mass-housing projects.

The company has been equipped with two full automatic production lines, including blocker, banding, pantograph, expander, etc., which produces over 7,500 square meters various types of panels daily, equaling to construction of 28 75-sq.m units per day and/or 10,000 residential units per annum. Despite commissioning and operating the largest and various production lines of construction panel, which have been used massively in mass-housing construction industrially, he said, "Construction of earthquake resistant building with high quality and durable premises has been put atop agenda of company." Elsewhere in his remarks, he revealed invigoration of development program of building industry qualitatively and quantitatively through commissioning seismic isolation systems, readymade dry concrete production lines, solar energy production systems, boosting production capacity of pre-constructed buildings.

He further introduced expansion project of Paykar Bonyan Panel Company and added, "This giant project includes large and various sectors with the production capacity of necessary products for construction of 50,000 75-sq.m residential units

annually."

He enumerated expansion projects of company such as commissioning research and development (R&D) unit, installing and commissioning highly advanced systems (seismic and damper systems), fortifying and strengthening systems, insulation of extant buildings, commissioning readymade dry concrete production line in various grades for construction of column and shear wall of all inner-city projects, portable and importable panels, etc.

With industrial development, observing requirements of international standards, it is hoped that immethodical sales of valuable and non-renewable natural resources like oil and gas will be prevented.

In addition to receiving valuable awards from prestigious domestic and foreign seminars, founder of industrial construction technology of country was introduced as one of top industrialists of Tehran Province by the Ministry of Industries and Mines. He called on senior officials of the ministry, including Eng. Afshin Roghani Deputy Industries Minister to Industrial Affairs, and Eng. Mohammad-Reza Mes-Foroush Head of Tehran Province Industries and Mines Organization, to take effective steps with the aim of settling problems of company qualitatively and quantitatively.

For their parts, Messrs Eng. Afshin Roghani and Eng. Mohammad-Reza Mes-Foroush expressed their readiness to support objectives of this industrial unit.

In a seminar entitled "Supportive Package of Industry and Mine of Country" held on 10.8.89 (Nov. 1, 2010), a plaque of honor was awarded to Founder of Modern Technology in industrialization sector, Eng. Mostafa Mahmoudi Managing director of Paykar Bonyan Holding Company.
