

During Sixth Appreciation Festival of Tehran Province Entrepreneurs:

Mostafa Mahmudi, Founder & Head of Board of Directors of Paykar Bonyan Companies Group Appreciated

Founder and Head of Board of Directors of Paykar Bonyan Companies Group with over 50 years of experiences in producing, exporting, and implementing industrial projects has been introduced as the candidate for the sixth Appreciation Festival of Tehran Province Top Entrepreneurs. Mostafa Mahmudi who is considered as a salient industrialist as well, concurrent with ninth and tenth governments' constructive activities, has taken giant strides in the field of industrial construction of housing. In an interview with our correspondent this veteran industrialist said, "Development plan phase 2 of Paykar Bonyan Panel Factory is ready to be implemented through which the factory will be able to produce 30,000 housing units in a year with utilizing cutting edge industrial machinery made in Europe. We hope riles and forex facilities needed for this project to be allocated and ceded on time.

Mahmudi who believes our prosperity is depended on production activities which must meet international standards in all fields, said, "Previously, I managed some of my offices overseas successfully which that matter was indebted in our products' accuracy and high quality," adding, presently we must do the same in order our products to meet international standards.

"Present constructed factory in Iran has received international architecture award and has been appreciated, meanwhile, after 40 years it has been ranked amid the first 200 factories among 2,000 participants from all over the world gathered in Barcelona," Mahmudi pointed out adding, current Paykar Bonyan Panel Factors has been constructed in a way in which research opportunities are available.

"Why must not we produce some buildings with at least 100 years lifetime to live with peace of mind about repairing expenses," asked Mahmudi adding, once Germans built some buildings in Iran which are use without any problem thus far and our youth's energy, mental vigor, ambition, enthusiasm, interest and innovation are proved that we can materialize this wish simply if government body and relevant officials don't leave us alone and support us

Top Entrepreneur & Forerunner in Industrial Construction of Housing

drastically. Pointing to international developments, Mahmudi said, "The first decade of 21st century passed and with onset of 1390 Iranian calendar (started March 21, 2011) we have entered the last decade of 14th solar Hegira which is simultaneous with humans' progress in the various fields of science and technology, thereupon, if we don't seize this opportunities, we will remain behind this trend of development for good.

"Through studying life stories of some well-known scientists on whom current all-out developments are depended, we can find out that no barrier can quit the resolved movement of human being to access his/her demands," Mahmudi went on to say, adding, utilizing time, good thoughts, and perseverance always have work biggest barriers out from humans' improvement way.

Elsewhere in his remarks he said, "Regarding durable

countries worldwide regarding resources due to comprising underground recourses, valuable minerals and metals, valuable herbal roots, four seasons climate, young society with high intelligence ability, rich cultural heritage, ecotourism sole condition, unparalleled strategic position in the region, under sunshine vast area, and many other advantages which along with culture, religion and morality are paramount and valuable capitals which must be understood and utilized on time."

Mahmudi emphasized that through this view and based on individual and social responsibilities which

pressing need to mass production of housing which is resulted from population growth in the first decade after Islamic Revolution and in the meantime due to 1980s decade born youth's demands to job and marriage, we felt the responsibility of working this bottleneck out and through studying new method of mass production of housing according to the most optimized construction methods, we embarked on constructing Paykar Bonyan Panel Factory in Parand Industrial Estate in less than eight months."

"Beside operating production line of semi-prefabricated houses with applying up to date technology of Europe, through utilizing knowledge-oriented organization other than complete transferring of technology, upgrading the said technology was put at our agenda and through feasibility studies and researches moreover increasing products' quality hand quantity, we embarked on receiving industrial permit to establish phase two of Paykar Bonyan Panel Factory to utilize modern and advanced technology as our future objectives," Mahmudi explained.

He further outlined some of gained achievements and honors by this group as winning the fist rank of architecture reward in 2007 for planning and implementing Paykar Bonyan Panel Factory, being invited to International Architecture Festival in Barcelona 2008, receiving appreciation plaque in the field of industrial building from the said festival for the first time in the country's history, being introduced in architecture records publication of U.S in 2009, receiving ISO 9001-2000, receiving quality assurance standard, receiving encouragement standard 7143 and mandatory standard of 11108 from ISIRI, receiving technical approval for province, three presented systems from Building Research Center and Housing & Urban Development Ministry, being introduced in Standard Building Materials Book selected by Tehran Municipality, being introduced in Iran Contemporary Architecture Book, receiving appreciation plaque as exemplary industrialist of Tehran Province.

He went on to say, "Presently 80% of factory's phase one is active and over 8,000 residential units of great Mehr Housing Plan is under construction by this company's technology which has generated at least 10,000 indirect job opportunities across the country."

To conclude his remarks, Mahmudi said, "We hope in the year which is named after Economic Jihad and in line with Double Endeavor Double Ambition in all constructive fields, motto of Consumption Pattern Correction can be materialized through permanent relation of sciences and industries. We hope once more to see that day in which our country's industries have met such high levels of standards which have enabled them to export technology and higher value-added materials not national capitals including oil and gas," adding, through pursuing abovementioned policies, we will certainly meet the objectives farther up prospective document.

Mostafa Mahmudi:
"Presently, over 80% annual capacity of factory's phase one is active and over 8,000 residential units of great Mehr Housing Plan are under construction by this company's technology through which over 10,000 indirect job opportunities have been generated across the country."

and all-out development, when we study the history of industrial revolution in the West, we can find out that their scientists had inspired from Islamic Iran and in tandem when we review the trend of rehabilitation of Japan and Germany after termination of World War II, we come to this conclusion that just recognizing, observing and upgrading international standards can pave the way of our progress toward a glorified economy." Founder of Paykar Bonyan Industrial Group pointed out that, fortunately Almighty God has gifted this country endless lument capitals and resource, adding, "This country is being placed amid 10 richest

we shoulder, complex of companies which is known today as Paykar Bonyan Industrial group was formed over half-a-century ago and started its professional activities. Presently our group has directly employed over 250 technical and engineering personnel and over 10,000 staff indirectly across the country who are rendering technical and engineering services in the fields of planning, training, implementation of industrial automation projects, production, exporting and issuing technical certificates for industries' experts.

While pointing to the last subsidiary complex of this group Mahmudi said, "Regarding people's
